

# Mohammad Nikbakht

Georgia Institute of Technology, Atlanta, GA, 30332, USA  
mohnikbakht@gatech.edu • mohnikbakht97@gmail.com • +1 (404) 960-1275 • <http://www.mohnikbakht.com>

OBJECTIVE	Graduating with a PhD in Electrical and Computer Engineering, with 4+ years of experience in machine learning. I am actively seeking a co-op or full-time position where I can contribute to transformative advancements in the health AI industry and facilitate more efficient, and personalized care to benefit people.			
EDUCATION	Georgia Institute of Technology, Atlanta, Georgia, USA			
	▪ PhD in Electrical and Computer Engineering	Aug 2019 - Dec 2023 (Expected)		
	• Adviser: Prof. Omer Inan			
	• Focus: Deep Learning, Health AI, Biomedical Sensing.			
	• Cumulative GPA: 4.00 / 4.00			
EDUCATION	▪ MSc in Electrical and Computer Engineering	Aug 2019 - May 2022		
	• Cumulative GPA: 4.00 / 4.00			
	▪ Minor in Strategy and Technology Innovation	Jan 2022 - May 2023		
	• Focus: Market Analysis, Technology Analysis, Financial Analysis, Business Model Design.			
	• Cumulative GPA: 4.00 / 4.00			
EDUCATION	University of Tehran, Tehran, Iran			
	▪ BSc in Electrical and Computer Engineering	Aug 2015 - Aug 2019		
	• Graduated with College Honors.			
	• Cumulative GPA: 18.91/20.00			
	PROFESSIONAL EXPERIENCE	Data Scientist intern at OMNY Health, Atlanta, GA, USA		
▪ Social Determinants of Health Extraction from EHR Notes (NLP - LLMs)		May 2022 - Aug 2022		
• Performed feasibility analyses on the OMNY Health data platform, encompassing data from 540,000 patients.				
• Transformed the OMNY Health data platform by implementing a Natural Language Processing (NLP) product based on LLMs for SDoH labeling of unstructured clinical notes.				
• Led the domain adaptation of BERT using clinical notes and fine-tuning for a multilabel SDoH classification task.				
PROFESSIONAL EXPERIENCE	• Presented the work at ISPOR conference 2022. Submitted a journal paper to JMIR.			
	• Focus: deep learning, self-supervised learning, big data, natural language processing, text classification, large language models			
	Data Scientist intern at SensorsCall, Atlanta, GA, USA			
	▪ Activity Classification Using Domestic Sounds (Based on CNN)	May 2021 - Aug 2021		
	• Designed a hardware-aware model based on CNN architecture for activity detection using domestic sounds.			
PROFESSIONAL EXPERIENCE	• Deployed the model to an IoT device, employing the lightweight TensorFlow Lite framework, for edge computing.			
	• This solution is actively utilized by individuals and caregivers to monitor the well-being of seniors living independently.			
	• Focus: deep learning, audio processing, audio classification, activity recognition			
	RESEARCH EXPERIENCE	Graduate Research Assistant at Inan Research Lab (IRL), Georgia Tech, Atlanta, GA, USA		
		▪ Generative Pretraining for ICU EKG Signals (Based on GPT-II)	Jul 2023 - Dec 2023	
• Pioneering the design of generative pre-trained transformer (GPT) architectures for EKG signal generation.				
• Leading the development of foundation models in health AI for cardiac signals.				
• Aim: To revolutionize risk prediction, patient condition forecasting, and preventive care in ICUs.				
RESEARCH EXPERIENCE	• Focus: deep learning, self-supervised learning, large language models, generative AI, signal processing			
	▪ Cardiac Signal Denoising Without Clean Labels (Based on U-Net)	Dec 2022 - Jul 2023		
	• Designed a U-Net architecture trained without clean labels to mitigate motion noise from cardiac signals.			
	• Improved health parameter (HR, PEP, LVET) estimation accuracy during activities to meet FDA standards, enabling precise health parameter monitoring during daily activities.			
	• Accepted paper at BHI conference. Submitted journal manuscript to JAMIA.			
RESEARCH EXPERIENCE	• Focus: deep learning, image reconstruction, blind denoising, signal processing, computer vision			
	• GitHub: https://github.com/mohnikbakht/SCG_Walking_Denoising			
	▪ Noninvasive Cardiac Shunt Monitoring in Infants with CHD (Based on VAE)	Jan 2022 - Dec 2022		
	• Implemented a variational autoencoder (VAE) for classifying auditory characteristics of blood flow through shunts.			
	• Introduced a novel approach enabling frequent noninvasive shunt health evaluations using a digital stethoscope.			
RESEARCH EXPERIENCE	• Successful flow state classification under ECMO, elevated pulmonary artery pressure, after angioplasty and cyanosis.			

- Presented findings at Emory University. Submitted a journal manuscript to JBHI.
  - **Focus:** deep learning, unsupervised learning, autoencoders, audio processing, audio classification
  - **GitHub:** [https://github.com/mohnikbakht/PCG\\_Shunt\\_Demo](https://github.com/mohnikbakht/PCG_Shunt_Demo)
- **Synthetic Cardio-mechanical Signal Generation (Based on Transformers)** Aug 2021 - Jan 2022
    - Designed a transformer-based neural network for generation of synthetic, human-like SCG beats while exerting precise control over clinically relevant features.
    - Enabled applications such as dataset augmentation, online learning, and uncertainty quantification, ushering in a new era of cardiac diagnostics and predictive modeling.
    - Published in JAMIA (2023). Additionally, filed a nonprovisional patent application.
    - **Focus:** deep learning, self-supervised learning, generative AI, transformers, signal processing, large language models
    - **Paper** <https://academic.oup.com/jamia/article-abstract/30/7/1266/7117772>

## SKILLS

### Programming Languages

- Python (6+ y), MATLAB (4+ y), C (8+ y), C# (2+ y)

### Related Knowledge,

- **Deep Learning:** Unsupervised Learning, Self-Supervised Learning, Sequence Modeling, Distributed Computing, Network Architecture Development including Transformer Neural Networks, Autoencoders, VAEs, RNN, CNN, U-Net, ResNet.
- **Deep Learning Libraries and Frameworks:** PyTorch (4+ y), TensorFlow (2+ y), PySpark, Hugging Face Transformers, WandB, Scikit-learn.
- **Development Tools/Frameworks/Libraries:** SciPy, Pandas, Numpy, OpenCV, Flask, Jupyter, Google Cloud, Linux, Git, GPU
- **Biomedical Sensing:** Signal Processing (4+ y), Wearable Sensors (4+ y), Multi-Modal Sensing, Sensor Fusion, Biomedical Instrumentation, Human Study Design, Embedded Systems.

Leveraging Physiological Markers to Quantify the Transient Effects of Traumatic Stress and Non-Invasive Neuromodulation. Accepted In 2023 IEEE Engineering in Medicine and Biology Society Conference (EMBC)

#### PATENTS

- [1] **Nikbakht, M.**, Inan, O. T., Kamaleswaran, R., Biophysical Waveform and Actuation Synthesis Using Phantom Hardware Systems and Methods, US63/385874 (nonprovisional pending)

#### PROFESSIONAL SERVICES

##### Reviewer

- Journal of the American Medical Informatics Association (JAMIA)
- Journal of Medical Internet Research (JMIR)
- Journal of Biomedical and Health Informatics (JBHI)
- ACM Transactions on Computing for Healthcare (ACM Health)

#### HONORS & AWARDS

- Blended and Online Learning Design (BOLD) Fellowship 2022
- N. Walter Cox Memorial Fellowship Aug 2019
- Faculty of Engineers (FOE) Award of University of Tehran School of Engineering Apr 2019

#### HOBBIES

Swimming, Basketball, Hiking, Cooking
